# Website creation

Specifications

Create a website for a fictitious consulting company in pairs. The website creation process should begin by developing personas. Then, a site prototype should be made. The website should only use HTML and CSS, without JavaScript, and it should be responsive.

Used tools

- HTML/CSS
- Visual Studio Code
- Lucidchart

Acquired skills

- Use of the languages HTML/CSS
- Use of flexboxes
- Use of breakpoints for responsiveness
- Use of a modeling tool
- Awareness of ergonomic principles
